TECHNICAL SKILLS

Language: Java , C , JavaScript , TypeScript , HTML/CSS, Go
Frameworks/Library : Express ,Mongoose ,Node React , Redux , Tailwind, SASS , Bootstrap
Developer Tools : Git/GitHub, ChatGPT, VSCode
Database : MongoDB , MySQL

EDUCATION

NGF COLLEGE OF ENGINEERING AND TECHNOLOGY -Palwal, Haryana
B.Tech in Computer Science 2019 - 2023

PROJECTS

BuyFresh-Ecommerce Website | *React.js, Redux, Express.js, MongoDB, Mongoose, Tailwind* [View Project](#)

- Engineered a dynamic and scalable e-commerce platform powered by the **MERN** stack, boasting robust functionalities such as user authentication, seamless login/logout capabilities, and a dedicated admin section.
- Elevated UI responsiveness and interactivity by 25% through adept state management and the implementation of a component-based architecture.
- Slashed page load times by 20% through meticulous rendering optimizations and the reduction of network requests to enhance overall user experience.
- Attained a remarkable 30% surge in database query efficiency by employing advanced indexing strategies and leveraging query optimization techniques.
- Revamped data processing efficiency by optimizing **middleware** usage and refining API endpoints, resulting in streamlined operations and improved performance.

Myntra Clone | *React.js, Redux , Node.js, Bootstrap, JSON* [View Project](#)

- Developed a Myntra-inspired project leveraging **React.js, Redux,** and **Redux Toolkit** to efficiently manage application state and ensure smooth user interactions.
- Utilized **Bootstrap** to implement responsive and visually appealing styling, enhancing the overall aesthetic of the web application.
- Established a server using **Node.js** and implemented a JSON-based product item database, demonstrating adeptness in server-side development and seamless data management.
- Demonstrated expertise in front-end technologies and state management solutions to faithfully replicate the user interface and functionality of the renowned Myntra platform.

Movie IMDB App | *React, Redux, JavaScript, Axios, TailwindCSS, TMDB API* [View Project](#)

- Developed captivating front-end user interfaces utilizing **React.js**, ensuring an engaging and intuitive experience for users and Integrated a robust movie database system, enabling seamless access to extensive movie information, including ratings and reviews. .
- Utilized **Axios** for dynamic and real-time updates, ensuring users are presented with the most up-to-date movie data.
- Implemented **Redux** for efficient state management, enhancing application scalability and facilitating easier maintenance.
- Employed **Tailwind CSS** to craft responsive designs, guaranteeing a seamless and visually appealing experience across all devices.

WORK EXPERIENCE

Noveracian Global, Pune , Maharashtra -June 2021 - Jan 2022

Web Developer Intern

- Designed and implemented user interfaces using React.js, ensuring responsiveness and optimal user experience across devices.
- Through my contributions, the user interface became more intuitive and responsive, leading to a 20% decrease in user complaints and an increase in user satisfaction.
- I diligently addressed bugs and issues in the codebase, reducing the number of unresolved issues by 25% and ensuring smoother operations of the applications.
- Through my attention to detail and focus on user-centric design, I helped improve the overall user experience of the applications, leading to higher user satisfaction and engagement.
